OBJECTIVE

Motivated computer science graduate eager to use programming and problem-solving skills to build smart tech solutions. Ready to learn, grow, and contribute to a team that creates real impact.

EDUCATION

Bonam Venkata Chalamayya Engineering College

May 2021 – April 2025

- B.Tech in Computer Science and Engineering, GPA:8.54

INTERNSHIP EXPERIENCE

Software Tester - Intern at People Tech Group Inc. March, 2025 - June, 2025

- I gained hands-on experience in software testing basics and different testing types. I created test cases, tracked defects using TestRail and Jira, and worked with tools like Bitbucket and QNX Momentics IDE. I also handled specification documents and supported test management tasks.

DEEP LEARNING WITH A PART OF AI, May, 2024 - July, 2024

- Completed an internship at CITD Hyderabad, specializing in deep learning, where I developed and implemented advanced models to perform efficient text summarization and gained hands-on experience with cutting-edge AI techniques.

SKILLS

Programming Languages: C, Python, Java

Testing Skills:

Manual Testing (Test Case Design, Execution, SDLC, STLC)

Automation Testing (Basic Scripting, Test Automation Tools —Selenium, Robot Framework)

Database Management: SQL

Others: Problem-solving, Communication, Time Management, Adaptability, Leadership

PROJECTS

TEXT SUMMARISATION USING PIPELINE

- Developed a project on "Text Summarization Using the Pipeline Function, utilizing advanced deep learning techniques to efficiently process and summarize large datasets, optimizing Information Extraction for the Real World applications.

TOLL SYSTEM USING AUTOMATIC NUMBER PLATE DETECTION

- Built an automated toll system using Python and OpenCV for number plate detection and vehicle tracking. Enhanced toll collection accuracy and efficiency with computer vision and ML.

CERTIFICATIONS

- Python Programming from HQL
- Python for Data Science from NPTEL
- Java Programming from HQL

ACHIEVEMENTS

- Data Science Hackathon, 2022, Collaborated with a team of members to preprocess and a large dataset using python libraries such as pandas and numpy.
- Prathiba Award in secondary school of education
